Sizing

Easily make an element as wide or as tall (relative to its parent) with our width and height utilities.

Width and height utilities are generated from the `$sizes` Sass map in `_variables.scss`. Includes support for `25%`, `50%`, `75%`, and `100%` by default. Modify those values as you need to generate different utilities here.

Width 25%

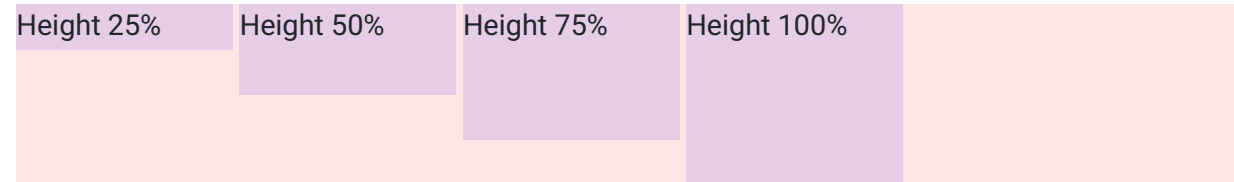

Width 50%

Width 75%

Width 100%

```
<div class="w-25 p-3" style="background-color: #eee;">Width 25%</div>
<div class="w-50 p-3" style="background-color: #eee;">Width 50%</div>
<div class="w-75 p-3" style="background-color: #eee;">Width 75%</div>
<div class="w-100 p-3" style="background-color: #eee;">Width 100%</div>
```

Copy

```
<div style="height: 100px; background-color: rgba(255,0,0,0.1);">
  <div class="h-25 d-inline-block" style="width: 120px; background-color: rgba(0,0,
  <div class="h-50 d-inline-block" style="width: 120px; background-color: rgba(0,0,
  <div class="h-75 d-inline-block" style="width: 120px; background-color: rgba(0,0,
  <div class="h-100 d-inline-block" style="width: 120px; background-color: rgba(0,0,0,0.1)
</div>
```

Copy

You can also use `max-width: 100%;` and `max-height: 100%;` utilities as needed.

Max-width = 100%

```
<img class="mw-100" src=https://getbootstrap.com/docs/4.0/utilities/%3C/span>"..."
```

Copy

Max-height
100%

```
<div style="height: 100px; background-color: rgba(255,0,0,0.1);">  
  <div class="mh-100" style="width: 100px; height: 200px; background-color: rgba(0,</div>
```

Copy
