Embeds

Create responsive video or slideshow embeds based on the width of the parent by creating an intrinsic ratio that scales on any device.

About

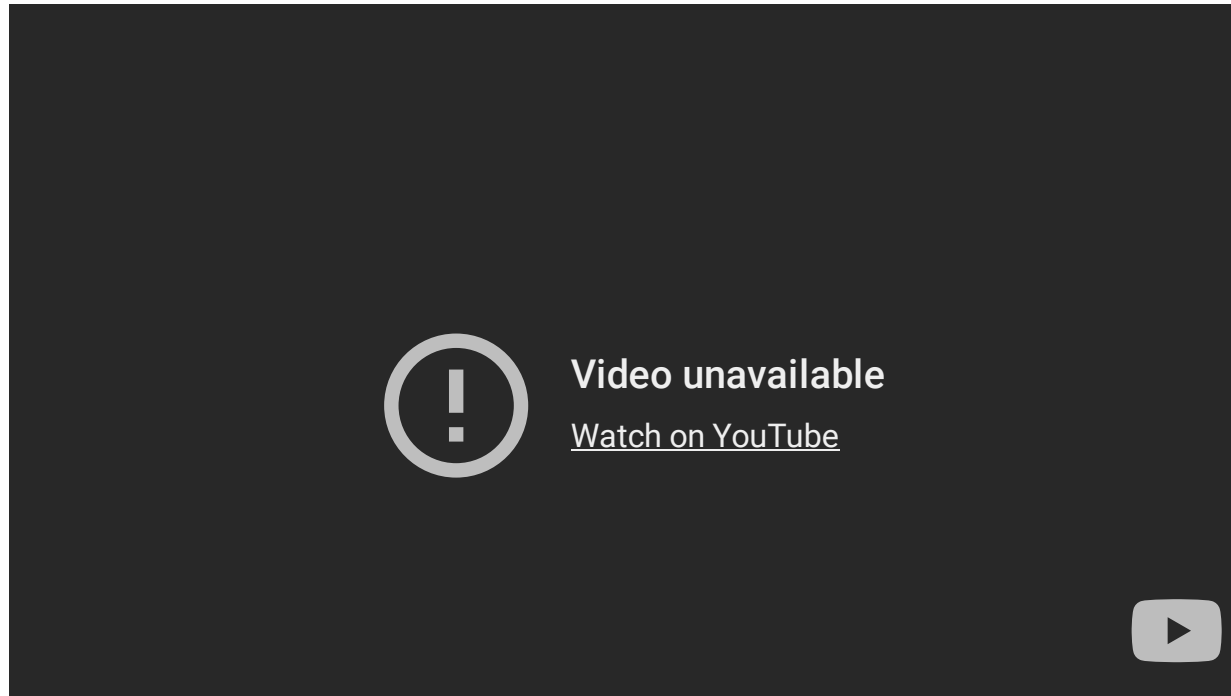

Rules are directly applied to `<iframe>`, `<embed>`, `<video>`, and `<object>` elements; optionally use an explicit descendant class `.embed-responsive-item` when you want to match the styling for other attributes.

Pro-Tip! You don't need to include `frameborder="0"` in your `<iframe>`s as we override that for you.

[About](#)[Example](#)[Aspect ratios](#)

Example

Wrap any embed like an `<iframe>` in a parent element with `.embed-responsive` and an aspect ratio. The `.embed-responsive-item` isn't strictly required, but we encourage it.

```
<div class="embed-responsive embed-responsive-16by9">  
  <iframe class="embed-responsive-item" src=https://getbootstrap.com/docs/4.0/util:  
</div>
```

[Copy](#)

Aspect ratios

Aspect ratios can be customized with modifier classes.

Copy

```
<!-- 21:9 aspect ratio -->
<div class="embed-responsive embed-responsive-21by9">
  <iframe class="embed-responsive-item" src=https://getbootstrap.com/docs/4.0/util:
</div>

<!-- 16:9 aspect ratio -->
<div class="embed-responsive embed-responsive-16by9">
  <iframe class="embed-responsive-item" src=https://getbootstrap.com/docs/4.0/util:
</div>

<!-- 4:3 aspect ratio -->
<div class="embed-responsive embed-responsive-4by3">
  <iframe class="embed-responsive-item" src=https://getbootstrap.com/docs/4.0/util:
</div>

<!-- 1:1 aspect ratio -->
<div class="embed-responsive embed-responsive-1by1">
  <iframe class="embed-responsive-item" src=https://getbootstrap.com/docs/4.0/util:
</div>
```
