Bootstrap 4 Carousel

The Carousel is a slideshow for cycling through elements.

How To Create a Carousel

The following example shows how to create a basic carousel with indicators and controls:

Example

```
<div class="attributecolor" style="color:red"> id="attributevaluecolor"
style="color:mediumblue">"demo" class="attributevaluecolor"
style="color:mediumblue">"carousel slide" data-ride="attributevaluecolor"
style="color:mediumblue">"carousel"="tagcolor" style="color:mediumblue">>

<!-- Indicators -->
<ul class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">"carousel-indicators"="tagcolor"
style="color:mediumblue">>
  <li class="attributecolor" style="color:red"> data-
target="attributevaluecolor" style="color:mediumblue">"#demo" data-slide-
to="attributevaluecolor" style="color:mediumblue">"0" class="attributevaluecolor"
style="color:mediumblue">"active"="tagcolor" style="color:mediumblue">></li
class="tagcolor" style="color:mediumblue">>
  <li class="attributecolor" style="color:red"> data-
target="attributevaluecolor" style="color:mediumblue">"#demo" data-slide-
to="attributevaluecolor" style="color:mediumblue">"1"="tagcolor"
style="color:mediumblue">></li class="tagcolor" style="color:mediumblue">>
  <li class="attributecolor" style="color:red"> data-
target="attributevaluecolor" style="color:mediumblue">"#demo" data-slide-
to="attributevaluecolor" style="color:mediumblue">"2"="tagcolor"
style="color:mediumblue">></li class="tagcolor" style="color:mediumblue">>
</ul class="tagcolor" style="color:mediumblue">>

<!-- The slideshow -->
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">"carousel-inner"="tagcolor" style="color:mediumblue">>
  <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">"carousel-item active"="tagcolor"
style="color:mediumblue">>
```

style="color:mediumblue">></span class="tagcolor" style="color:mediumblue">>
</a class="tagcolor" style="color:mediumblue">>

</div class="tagcolor" style="color:mediumblue">>

```

Example explained

A description of what each class from the example above do:

Class	Description
<code>.carousel</code>	Creates a carousel
<code>.carousel-indicators</code>	Adds indicators for the carousel. These are the little dots at the bottom of each slide (which indicates how many slides there are in the carousel, and which slide the user are currently viewing)
<code>.carousel-inner</code>	Adds slides to the carousel
<code>.carousel-item</code>	Specifies the content of each slide
<code>.carousel-control-prev</code>	Adds a left (previous) button to the carousel, which allows the user to go back between the slides
<code>.carousel-control-next</code>	Adds a right (next) button to the carousel, which allows the user to go forward between the slides
<code>.carousel-control-prev-icon</code>	Used together with <code>.carousel-control-prev</code> to create a "previous" button
<code>.carousel-control-next-icon</code>	Used together with <code>.carousel-control-next</code> to create a "next" button
<code>.slide</code>	Adds a CSS transition and animation effect when sliding from one item to the next. Remove this class if you do not want this effect

Add Captions to Slides

Add elements inside `<div class="carousel-caption">` within each `<div class="carousel-item">` to create a caption for each slide:

Example

```
<div class="attribute" style="color:red" class="attributevalue" style="color:mediumblue">="carousel-item"="tag" style="color:mediumblue">>
  ="la.jpg" alt="attributevalue" style="color:mediumblue">="Los Angeles"="tag" style="color:mediumblue">>
    <div class="attribute" style="color:red" class="attributevalue" style="color:mediumblue">="carousel-caption"="tag" style="color:mediumblue">>
      <h3 class="tag" style="color:mediumblue">Los Angeles</h3
class="tag" style="color:mediumblue">>
      <p class="tag" style="color:mediumblue">We had such a great time in LA!
</p class="tag" style="color:mediumblue">>
```

```
</div class="tagcolor" style="color:mediumblue">>  
</div class="tagcolor" style="color:mediumblue">>
```
