Bootstrap 4 Alerts

[< Previous](#)[Next >](#)

Bootstrap 4 Alerts

Bootstrap 4 provides an easy way to create predefined alert messages:

Success! This alert box indicates a successful or positive action.

Info! This alert box indicates a neutral informative change or action.

Warning! This alert box indicates a warning that might need attention.

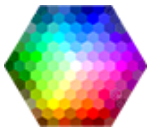

Danger! This alert box indicates a dangerous or potentially negative action.

Alerts are created with the `.alert` class, followed by one of the contextual classes `.alert-success`, `.alert-info`, `.alert-warning`, `.alert-danger`, `.alert-primary`, `.alert-secondary`, `.alert-light` or `.alert-dark`:

COLOR
PICKER

 Get Certified

Example

```
<div class="attribute" style="color:red"> class="attributevalue" style="color:mediumblue">= "alert alert-success"= "tag" style="color:mediumblue">>
  <strong class="tag" style="color:mediumblue">>Success!</strong
  class="tag" style="color:mediumblue">> Indicates a successful or positive
  action.
</div class="tag" style="color:mediumblue">>
```

Alert Links

Add the `alert-link` class to any links inside the alert box to create "matching colored links":

Success! You should **read this message.**

Info! You should **read this message.**

Warning! You should **read this message.**

Danger! You should **read this message.**

Primary! You should **read this message**.

Secondary! You should **read this message**.

Dark! You should **read this message**.

Light! You should **read this message**.

Example

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="alert alert-success"="tagcolor"
style="color:mediumblue">>
  <strong class="tagcolor" style="color:mediumblue">>Success!</strong
class="tagcolor" style="color:mediumblue">> You should <a class="attributecolor"
style="color:red"> href="attributevaluecolor" style="color:mediumblue">="#"
class="attributevaluecolor" style="color:mediumblue">="alert-link"="tagcolor"
style="color:mediumblue">>read this message</a class="tagcolor"
style="color:mediumblue">>.
</div class="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

Closing Alerts

Click on the "x" symbol to the right to close me.

To close the alert message, add a `.alert-dismissible` class to the alert container. Then add `class="close"` and `data-dismiss="alert"` to a link or a button element (when you click on this the alert box will disappear).

Example

```
<div class="attribute" style="color:red"> class="attributevalue"
style="color:mediumblue">="alert alert-success alert-dismissible"="tag"
style="color:mediumblue">>
  <button class="attribute" style="color:red"> type="attributevalue"
style="color:mediumblue">="button" class="attributevalue"
style="color:mediumblue">="close" data-dismiss="attributevalue"
style="color:mediumblue">="alert"="tag" style="color:mediumblue">>&times;
</button class="tag" style="color:mediumblue">>
  <strong class="tag" style="color:mediumblue">>Success!</strong
class="tag" style="color:mediumblue">> Indicates a successful or positive
action.
</div class="tag" style="color:mediumblue">>
```

Try it Yourself »

ADVERTISEMENT

Tip: `×` (×) is an HTML entity that is the preferred icon for close buttons, rather than the letter "x".

For a list of all HTML Entities, [visit our HTML Entities Reference](#).

Animated Alerts

Click on the "x" symbol to the right to close me. I will "fade" out.

The `.fade` and `.show` classes adds a fading effect when closing the alert message:

Example

```
<div class="attribute" style="color:red"> class="attributevalue" style="color:mediumblue">="alert alert-danger alert-dismissible fade show" tagcolor" style="color:mediumblue">>
```
