# Bootstrap 4 Jumbotron

[◀ Previous](#)[Next ▶](#)

## Bootstrap 4 Jumbotron

A jumbotron indicates a big grey box for calling extra attention to some special content or information.

**Tip:** Inside a jumbotron you can put nearly any valid HTML, including other Bootstrap elements/classes.

## Bootstrap Tutorial

Bootstrap is the most popular HTML, CSS, and JS framework for developing responsive, mobile-first projects on the web.

Use a `<div>` element with class `.jumbotron` to create a jumbotron:

## Example

```
<div class="attribute" style="color:red"> class="attributevalue"
style="color:mediumblue">= "jumbotron" = "tag" style="color:mediumblue">>
  <h1 class="tag" style="color:mediumblue">>Bootstrap Tutorial</h1
class="tag" style="color:mediumblue">>
  <p class="tag" style="color:mediumblue">>Bootstrap is the most popular
HTML, CSS...</p class="tag" style="color:mediumblue">>
</div class="tag" style="color:mediumblue">>
```

## Full-width Jumbotron

If you want a full-width jumbotron without rounded borders, add the `.jumbotron-fluid` class and a `.container` or `.container-fluid` inside of it:

## Example

```
<div class="attribute" style="color:red"> class="attributevalue"
style="color:mediumblue">= "jumbotron jumbotron-fluid" = "tag"
style="color:mediumblue">>
  <div class="attribute" style="color:red"> class="attributevalue"
style="color:mediumblue">= "container" = "tag" style="color:mediumblue">>
    <h1 class="tag" style="color:mediumblue">>Bootstrap Tutorial</h1
class="tag" style="color:mediumblue">>
    <p class="tag" style="color:mediumblue">>Bootstrap is the most popular
HTML, CSS...</p class="tag" style="color:mediumblue">>
```

```
</div class="tagcolor" style="color:mediumblue">>  
</div class="tagcolor" style="color:mediumblue">>
```
