Bootstrap 4 Modal

❮ Previous   Next ❯

Bootstrap 4 Modal

The Modal component is a dialog box/popup window that is displayed on top of the current page:

Open modal

How To Create a Modal

The following example shows how to create a basic modal:

Example

```
<!-- Button to Open the Modal -->
<button class="attributecolor" style="color:red"> type="attributevaluecolor"
style="color:mediumblue">="button" class="attributevaluecolor"
style="color:mediumblue">="btn btn-primary" data-toggle="attributevaluecolor"
```

```
style="color:mediumblue">="modal" data-target="attributevaluecolor"
style="color:mediumblue">="#myModal"="tagcolor" style="color:mediumblue">>
  Open modal
</button class="tagcolor" style="color:mediumblue">>

<!-- The Modal -->
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal" id="attributevaluecolor"
style="color:mediumblue">="myModal"="tagcolor" style="color:mediumblue">>
  <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-dialog"="tagcolor" style="color:mediumblue">>
    <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-content"="tagcolor" style="color:mediumblue">>

      <!-- Modal Header -->
      <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-header"="tagcolor" style="color:mediumblue">>
        <h4 class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-title"="tagcolor"
style="color:mediumblue">>Modal Heading</h4 class="tagcolor"
style="color:mediumblue">>
        <button class="attributecolor" style="color:red">
type="attributevaluecolor" style="color:mediumblue">="button"
class="attributevaluecolor" style="color:mediumblue">="close" data-
dismiss="attributevaluecolor" style="color:mediumblue">="modal"="tagcolor"
style="color:mediumblue">>&times;</button class="tagcolor"
style="color:mediumblue">>
      </div class="tagcolor" style="color:mediumblue">>

      <!-- Modal body -->
      <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-body"="tagcolor" style="color:mediumblue">>
        Modal body..
      </div class="tagcolor" style="color:mediumblue">>

      <!-- Modal footer -->
      <div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-footer"="tagcolor" style="color:mediumblue">>
```

```
          <button class="attributecolor" style="color:red">
type="attributevaluecolor" style="color:mediumblue">="button"
class="attributevaluecolor" style="color:mediumblue">="btn btn-danger" data-
dismiss="attributevaluecolor" style="color:mediumblue">="modal"="tagcolor"
style="color:mediumblue">>Close</button class="tagcolor"
style="color:mediumblue">>
        </div class="tagcolor" style="color:mediumblue">>

    </div class="tagcolor" style="color:mediumblue">>
  </div class="tagcolor" style="color:mediumblue">>
</div class="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

Add animation

Use the `.fade` class to add a fading effect when opening and closing the modal:

Example

```
<!-- Fading modal -->
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal fade"="tagcolor" style="color:mediumblue">></div
class="tagcolor" style="color:mediumblue">>

<!-- Modal without animation -->
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal"="tagcolor" style="color:mediumblue">></div
class="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

Modal Size

Change the size of the modal by adding the `.modal-sm` class for small modals, `.modal-lg` class for large modals, or `.modal-xl` for extra large modals.

Add the size class to the `<div>` element with class `.modal-dialog`:

Small Modal

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor" style="color:mediumblue">="modal-dialog modal-sm"="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

Large Modal

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor" style="color:mediumblue">="modal-dialog modal-lg"="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

Extra Large Modal

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-dialog modal-xl"="tagcolor"
style="color:mediumblue">>
```

Try it Yourself »

By default, modals are "medium" in size.

Centered Modal

Center the modal vertically and horizontally within the page, with the `.modal-dialog-centered` class:

Example

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor"
style="color:mediumblue">="modal-dialog modal-dialog-centered"="tagcolor"
style="color:mediumblue">>
```

Try it Yourself »

Scrolling Modal

When you have a lot of content inside the modal, a scrollbar is added to the page. See the examples below to understand it:

Example

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor" style="color:mediumblue">="modal-dialog"="tagcolor" style="color:mediumblue">>
```

Try it Yourself »

However, it is possible to only scroll inside the modal, instead of the page itself, by adding `.modal-dialog-scrollable` to `.modal-dialog`:

Example

```
<div class="attributecolor" style="color:red"> class="attributevaluecolor" style="color:mediumblue">="modal-dialog modal-dialog-scrollable"="tagcolor" style="color:mediumblue">>
```

Try it Yourself »
